It's funny you should say that.....! The best laid plans of mice and men sometimes go...colorblind?

Hi Ron,

Where are the photos???

I'm very interested how the roller technique turns out.

I have a 924S that I want to try this on.

The pictures don't really show the detail but I can say it's coming out ok. The first three coats don't cover much and you start to wonder if it was a good idea but after 5 coats it's mostly covered although you can still see roller marks and air bubbles. I just color sanded it the last two nights and now i'm ready for a few more coats. It's definitely hard work but I think(hope) it's going to look good. But this is just the first color, I've got a stripe to paint as well but I'm going to rattlecan that.
