

Datalogging trial

Posted by JerryW - 11 May 2010 03:58

How many of the Nor Cal guys would like to trial a new data logger ?

For those of us with Traqmate, there is no benefit but for those who have not yet purchased a datalogger you might like it.

There is a potential for the vendor to bring some out to Infineon for the June race (Or some other race - not sure yet). Cost is significantly less than Traqmate. If I can get a preview of how many would be interested I'll pass it on to the vendor.

You can find more details of the MD60 at

Wow, for \$399, I am definitely interested.
