

83 chassis, 86 engine 944 spec for sale

Posted by brandeau - 03 Apr 2015 13:20

It is an 83 chassis.

Has an 86 engine that was rebuilt by Art at Autopoint Motors.

New radiator.

400lb springs.

Interior nicely stripped of non-essentials.

Nascar style rollcage.

My nephew was building out this car for 944Spec and then he got a girlfriend. It is not quite race ready -- it needs a new fuel pump. The window netting, fire extinguisher, seat and harness are all expired and will need to be replaced. Obviously you will need a fresh set of tires.

The car is near [Pasadena, CA](#).

Any reasonable offer will likely be accepted.
