Street-Legal 944 Track Car	with	415hp
----------------------------	------	-------

Posted by jrperkin67 - 04 Dec 2015 12:34

Selling this custom-built, street-legal track car. Car is registered and insured with valid tags. Repainted December 2015. No dents or dings.

1987 Porsche 944S2 with 415hp LS2 racing engine built by Turn-key Engines, giving it roughly 3 times the original power with same weight. Car is fully built track car with heavy roll cage, dual Sparco racing seats, 5-point seat belts, guick detach Momo steering wheel, coil over adjustable suspension all around, camber plates, 2 sets of wheels and tires (Pilot Super Sports for street/wet, Hoosier R7 slicks for track/dry), 6-piston " Big Red" brakes from 911 turbo, 5-speed 944 turbo transmission, and much more.

Car has won First Place in Time Trials TT3 group racing with NASA twice this year at Road Atlanta and Virginia International Raceway this year. Bottom line is this--if you want the fastest car at the track, this is it. It will out-accelerate, out-brake, and out-corner everything else on the track.

PRICE: \$24,500. See full ad and pics on Craigslist at greenville.craigslist.org/cto/5345295888.html

Please send detailed pics of cage including mounting points. Will need to know tubing thickness and diameter. A close up shot of a welded joint on cage.

Can you tell me the spring rates and what shocks are on this car?

I have also sent you some questions through CL, please provide that info as well.

I live on the west coast so I will need lots of details since I will not see this car before hand.

You can post here or email to bajabuzz at yahoo dot com
