Posted by richs944 - 30 Sep 2008 11:12

Does anyone know how to put pix on this forum? I'm trying to sale my spec car? You also can look under the drivers list under me name to see the car. Sorry I couldn't put more pix or info on ad. If you need more info about the car and/or trailer call or e-mail me.

Again sorry I couldn't put more pix or info on ad

pics have to be hosted by a site (photobucket or something like that) then you paste in the URL of the photo (Img button) for it to appear on this forum. Post 'em up !!
