

1983- 944 TONS of new parts, perfect track project

Posted by indyryder3x - 02 Mar 2010 21:44

Clear title, no leans, registered and inspected in MA. Currently in storage in Albany, NY. Over \$5300 (my discounted cost, not list) in new parts in the last year alone. I am a mechanic so all the work was completed correctly. The car is very well sorted all major service is completed last year. The car is sold as is with all the paper work. It would make an excellent daily driver or Porsche club driving school/track car.

Minor issues are worn driver's seat, flaking paint on the L/F corner from minor previous repair (chassis is straight), a few small chips, dings, scratches (it's a 26 year old car that's a driver, normal stuff) Car is very solid and looks nice. Please don't hesitate to respond. It's a great car but I'm just looking to pay some college bills off.

Here's what you want to see....

-2.5L four cylinder engine runs great, no smoke, does not burn oil or coolant. Currently has Castrol GTX 20w50 oil. The water pump, oil cooler, and belts were serviced last fall and only 8,000 miles. Compression numbers are as follows:

1- 190 psi

2- 185 psi

3- 190 psi

4- 185 psi

-Rear Transaxle is from an 84 944 with 67,000 miles. Shifts fine, no grinds or notchy shift pattern. Currently running Motul Gearbox 80w-90 gear oil.

-Previous owner installed new clutch, cylinder head and gasket, and DME computer.

New parts (have all receipts):

-BF Goodrich Sport tires (225/50-R15)

-Bosch platinum sparkplugs

-Bosch Cap and rotor

944-SPEC - 944SPEC - low cost wheel to wheel racing

Generated: 3 July, 2026, 04:51

Really, a completely rebuilt car for a good price and no one wants it?

Only one thing to do at this point, \$2800 obo haha just get this out of my garage....

Yea its a great car, I bought it from one of my teachers in school, rebuilt it and now I'm moving on to something different.

Its never been tracked, always a street car. I've driven long distance with it and never even hiccuped but im going to buy an E36 M3 sedan (love the 4 door) so I'd like it gone as soon as i can.
