There are no lights on the car (except brake lights). It does come with the radio harness, roof antennea, PTT, radio box Etc. I do have a set of radios that I will part with but you will need your own helmet kit and ear buds.

My experience with these cars is that they burn 8-9 GPH during a sprint race. Less in an Enduro when short shifting and driving less than 100%

Maybe someone has a better idea about fuel consumption for enduros.
