

For Sale: '87 944 S

Posted by GT944 - 06 Mar 2011 13:15

For Sale: '87 Porsche 944 S - \$4000

Chassis Mileage: ~ 171,000 Speedo has been changed

Motor Mileage: ~94,000 – changed about 3,500 miles ago

Well prepared DE car, street legal and drivable to events.

- 16x8" Design 90 Wheels mounted with 245/45R16 Toyo RA-1 tires (3/32" tread left)
- 944 Turbo S M030 front struts w/ Turbo Cup variable rate springs & adjustable spring perches
- Rear shocks replaced w/ coilovers w/ adjustable spring perches
- A/C Delete kit w/ associated parts removed (condenser, evaporator, etc.)
- Front brake ducting
- KFP Gold racing brake pads all around – fronts are almost new (2 track sessions) rears at ~30% life, brakes have been bled recently
- Mocal oil cooler
- 2.5" Exhaust from downpipe w/ Turbo muffler and interchangeable catalytic converter delete pipe (Cat is currently installed)
- Timing belt, accessory belts, and water pump replaced when motor was installed
- Fairly new radiator w/ fresh hoses, very little wear from debris, very fresh coolant
- Freshly covered standard seats, clean interior w/ dash cover

Things I would suggest:

- Rebuild the front ball joints – have not been done recently
- Install front camber plates eventually – current alignment allows for 1.5* negative camber in front, 2.5* negative camber in the rear.

Set up for DE, is it caged?

Also where is the vehicle located?

No cage, unfortunately. The vehicle is in Salt Lake City, UT. I neglected to post up pictures, so here's a link to recent photos and a track video.
