Late Weltmeister Front Sway Bar Posted by Big Dog - 19 Jun 2011 11:06
Gentlemen, I have a Weltmeister 28mm front sway bar for sale. It comes with the upgraded front down links that use heim joints both top and bottom (rather than just on the bottom). This upgrade replaces the rubber bushing on the top down link to remove another source of movement and improves the precision and feel.
It is available for \$450 + shipping for the complete assembly or \$400 without the upgraded down links.
