Anyone have another one?
Thanks!

thanks for the response. I left a message at the # you left. just need a few details. I'm putting in in a 87 924S with an 88 trive train.
wondering about condition, what it came out of or code, where you are etc and price you're asking?

I understand there to be a couple of aftermarket solutions. Kits are available from Guards but are pricey. Something else available is a Quaife (sp?). any comments from those with experience with either of these solutions?
