

## IO Port camera mount, Kill switch & misc 944 parts

Posted by 944Racer72 - 18 Jan 2011 20:10

---

Hi guys,

I've got some stuff up on ebay. The big racing things are an I/O Port video camera mount (new) and a Painless Wiring remote kill switch (new). Also some 944 odds and ends. Any NorCal guys, I can deliver to the track in Feb.

Search for username &quot;morepowerforyou&quot;

Thanks!

Here's the link to Painless' description page. Make me an offer if you are interested:

im guessing that only has two terminals though right. Just kills the battery- cannot run the coil wire through that?

Only 2 wires but there is no reason you can't run coil positive off the "cold" side which will cut power to the coil when you cut the switch.
