Tapatalk Support?
Posted by GT944 - 03 Oct 2011 11:33

_____

Hey all.

I'm not sure if anyone else is interested in this, but could one of our mod's please take the time to sign us up for Tapatalk? I think its free, and hopefully its not a big hassle. If you could sign us up, I, for one, would really like to be able to run 944-spec.org from the Tapatalk forum app on my droid.

Here's the link to sign up - you have to be a moderator to do this for us, then everyone who runs Tapatalk can just add the forum and away we go.

tapatalk.com/plugin.php

Thanks in advance

_____

Sounds like a good idea. We'll need Ken's help to make this happen.

_____

As in Ken Huey? I would send him a PM, if we could do that on this forum, or an email, but I don't have his contact info -- does anyone? Or would anyone mind sending him a note for me?

Thanks

He will probably see it here, but you can use the little "contact us" link in the upper right hand corner to email him.
