

Right side net

Posted by bcc1323 - 28 Mar 2009 13:58

I just had a high speed side impact with a wall. My right side net was fastened to the body with a chain. I went through the net like it wasn't even there. The chain pulled apart.

What I'm saying is, make sure your net is secure and in case

you need it, it will hold.

That's a good idea. I'm thinking of adding a knee bar to my next car.
