944-SPEC - 944SPEC - low cost wheel to wheel racing

Generated: 1 September, 2025, 05:48 Enduro Strategies
Posted by JRichard - 11 Oct 2009 11:47 We've got an three hour enduro comming up in November...I know its not the 24hs of LeMans but its going to take a pit stop and therefor some kind of pit strategy... Haven't closed if it will involve a driver change yet, but what you guys have done in the past? (that worked...) Re:Enduro Strategies
Posted by cbuzzetti - 19 Oct 2009 06:50 The cans are illegal for the WERC series because they are actually 6 gallon cans. They call them 5 gal cans but the ad you posted say they hold 6. Yeah it's easy just drive 95% for 3 hrs and you will be the winner. Happens all the time. hahahahahahahahah Re:Enduro Strategies

So, 26 gallons is 3 hours? Everybody think that a 944 does about 8 and a bit gallons per hour? I'm thinking of the 9 hour enduro in Road Atlanta this Dec.
