

Steering hub hardware

Posted by cullenwinter - 30 Dec 2008 08:24

I'm helping Mitch shop for a steering hub adapter and quick release for the #24 car. Any recommendations on safe and inexpensive hardware ?

I never did that shopping since the PO had installed already in my car. Thanks in advance

just a word of caution ...

At Nationals in 2007 3 cars were crashed due to steering wheel / quick release issues .

I spent way too much on my first one then I did it two more times ...

This is what I ended up doing for mine. VERY cheap and safe too:
