

Getting the glue off in the interior

Posted by mug23 - 08 Feb 2009 10:07

Hello,

I'm in the process of taking some of the interior pieces out in the back seat and when I was taking the carpets out, there are like million pounds of glue Porsche uses to stick the carpets in there.

What do you guys use to take all that glue off? Heat gun? What chemicals can you use that would be easy?

Thanks

=====
